### *Our Methods of Growing Roses*

Through years of constant scientific research we have developed a spray program proved best for control of fungi, mildew, and black-spot. This regular spraying maintains the foliage through which all food elements are stored. Regular cultivation insures well developed plants.

CLIMBER — NEW BLAZE

### *Handling and Shipping of Roses*

Our methods of handling Roses in digging and shipping are as important as the growing of good Roses. We are careful at all times to prevent any drying out of the roots or tops; and to see that our plants are properly dug and labeled, handled and packed for shipment.
